2.1 Preamble to formation of Prime Finance Second Mutual Fund

Unit Fund in other words open-end mutual fund is one of the most common and widely accepted investment vehicles all over the world. Unit funds are synonymous with mutual funds world wide as most of them are open-end mutual funds by nature. In Bangladesh, unit fund was introduced by Investment Corporation of Bangladesh (ICB), a public sector investment bank, in 1981 while PAMC launched Prime Financial First Unit Fund, the first private sector unit fund in 2010.

Considering the vital role that open-end mutual funds can play in improving the capital market efficiency, Prime Finance & Investment Limited, one of the leading financial Institution, has come forward and sponsored an open end mutual fund in Bangladesh. Prime Finance & Investment Limited feels Bangladesh capital market is passing through a difficult and lean period. Sponsoring Prime Finance Second Mutual Fund will offer them a responsible and profitable way of participating towards the improvement of the capital market.

Prime Finance & Investment Limited has chosen two trusted partners: Prime Finance Asset Management Company Limited (PAMC), an associate company of Prime Finance & Investment Limited and the fifth private sector Asset Management Company of the country, as the Asset Manager, and Investment Corporation of Bangladesh as the Trustee and the Custodian of the Fund.

2.2 Necessity of unit fund in the context of the current state of affairs of the capital market

Bangladesh capital market has thousands of individual small investors who do not have access to the proper investment decision-making tools such as equity research, market information etc. That is why rumors and personal whim have become the investment tools for these individuals speculating about the stock prices. As a result, the country's capital market does not behave rationally.

In the present scenario, open-end mutual fund may act as an effective investment vehicle for those who like to rely on professional fund manager for investment management as it has been tested over time all around the world in both developed and emerging economies. The professional fund management, portfolio diversification, low cost but high quality investing, convenience, flexibility, and liquidity are distinct features of an open-end mutual fund that make it a very reliable market instrument for small investors. It is apparent that there is ample opportunity for growth of our nascent mutual fund industry.

It can be said that in course of time open-end mutual fund will play a vital role in our capital market because of its inherent strength of being a professionally managed investment vehicle and the small individual investors will gradually go under the umbrella of professional fund managers like those in any other emerging market.

2.3 Advantages in investing in Prime Finance Second Mutual Fund
